The Pope has charged one of his household to offer up a special prover for the Queen every day, while selebrating the mass, but he has not ordered inv public prayers to be said for her. Interesting Discovorice. In digging out the foundations for some new buildings in the Place de la Bastille, sianted at the entrance of the Rue Saint Antoine. some interesting discoveries have been made. Massive blocks of solid masonry have been come upon, which no doubt belonged to the ancient fortress that stood on this site, the first stone of which was laid by Harmes Ambriot. prévot of Paris, on the 22nd of April, 1370 Originally the Bastille Saint Autoine had but we towers, but others were soon afterwards added; and the edifice was still forther enlarged n the reigns of Charles VI and Henry II This Bastille, which was raised for the purpose of protecting the capital from the attacks of the Bourgniguous and the English, afterwards served the purposes of a State prison. Henry IV. deposited there for safety the royal treasury; and Solly tells us in his "Memoirs" that about the year 1610 the king had stowed away in the yaults of the building 15,878,000 posnds in coin, besides 10,000,000 put aside as a saving food. Some passages, steps, and cells almost perfect, have been met with; and amongst other remains of past ages a rided cannon has turned up, which shows that the boasted invention of modern times is not new,
